Project Description:

Abstract:

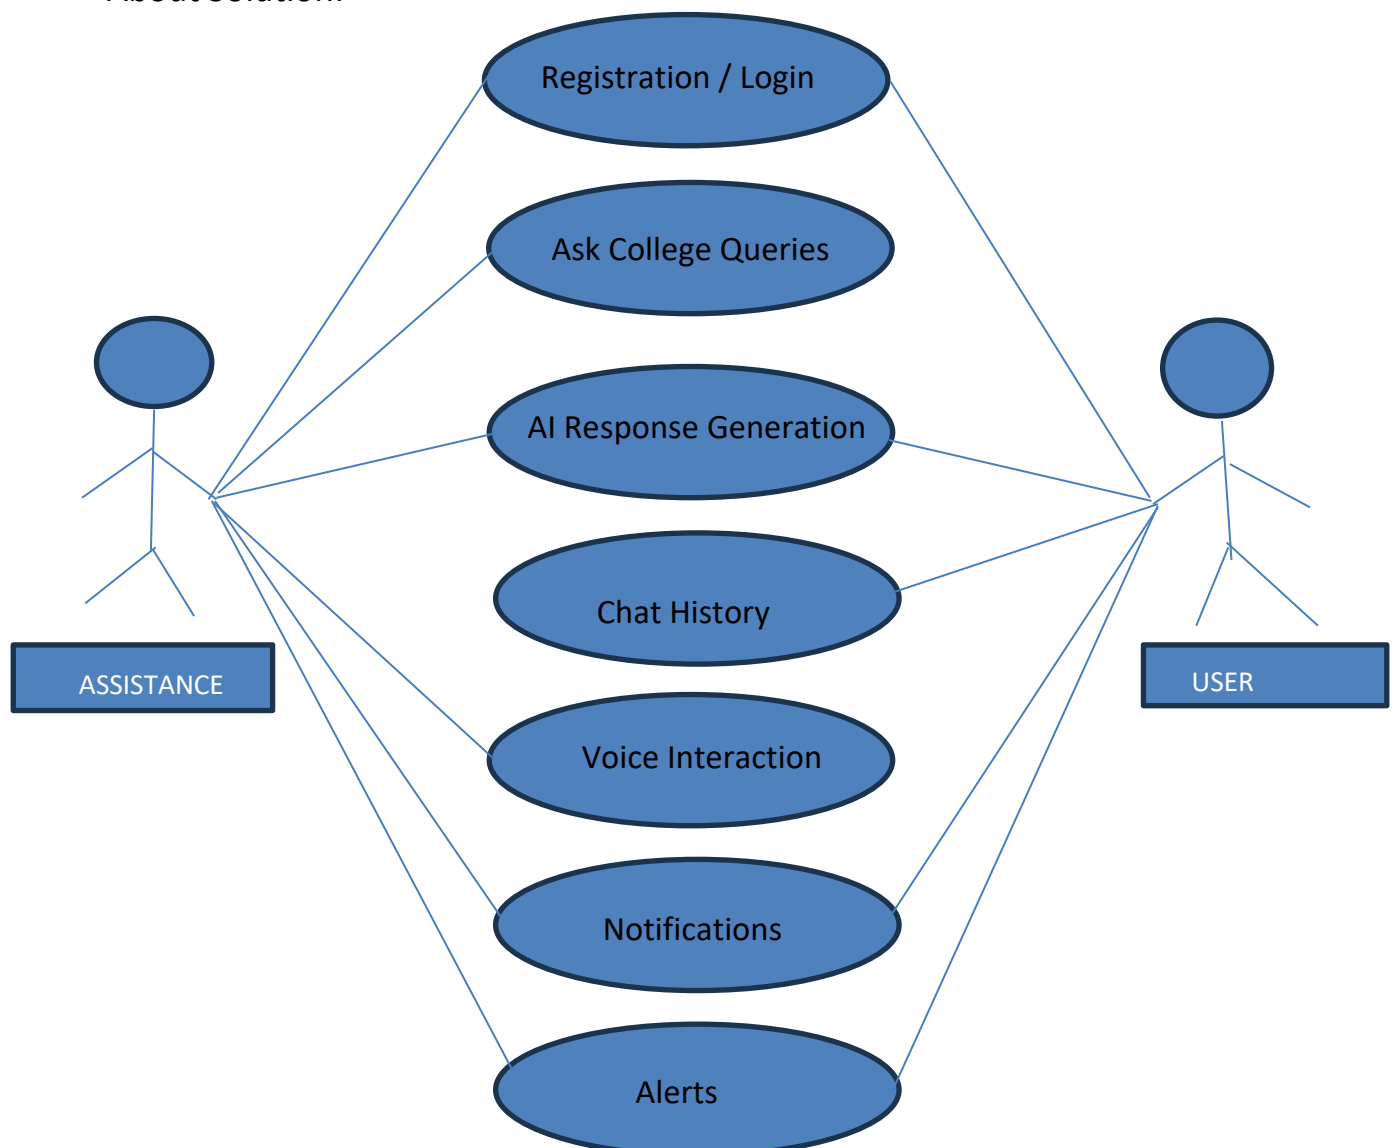

I. The AI Powered College Assistance Chatbot is an intelligent web application designed to assist students by providing instant responses to academic and administrative queries using Artificial Intelligence and Natural Language Processing. II. The primary

objective of the system is to reduce manual workload on college staff and provide students with 24/7 access to accurate college-related information

○ Features:

- User-friendly Interface: Ensures easy interaction for students.
- AI-based Query Handling: Provides accurate and contextual responses.
- User Registration and Profiles: : Allows personalized interaction
- Chat History:Stores previous conversations.
- Voice Input: Enables speech-based interaction
- Notifications and Alerts:Sends exam and event updates

About Solution:

Advantages:

- 24/7 Availability
- Reduced Administrative Load
- Faster Information Access
- Personalized Experience
- Scalable System

Flaws of Project:

- Internet Dependency
- Limited Emotional Intelligence
- Complex Queries May Need Human Support

Project Requirement:

***Hardware Requirements:**

- Server
- Multi-core Processor
- Minimum 8GB RAM
- Sufficient Storage
- High-Speed Internet

***Software Requirements:**

- Operating System: Windows / Linux
- Frontend: HTML, CSS, JavaScript, React.js
- Backend: Node.js, Express.js
- Database: MongoDB
- AI Engine: Dialogflow / Gemini AP

Conclusion:

The AI Powered College Assistance Chatbot enhances student–institution communication by providing intelligent, fast, and reliable responses. The project demonstrates the effective use of AI in the education sector
